Disclaimer

This document is CONFIDENTIAL & PROPRIETARY to Grant Thornton Bharat LLP (GTBLLP), and its circulation and use are RESTRICTED. All rights are reserved with respect to the contents of this proposal. It is supplied in confidence and, except for the intended recipient of this document and the purposes mentioned herein, it cannot be disclosed, duplicated, or otherwise used in whole or in part without the prior GTBLLP's written consent. No part of this work may be reproduced or transmitted by any means, electronic or mechanical, including photocopying and recording, or by any information storage or retrieval system, except as may be permitted in writing by GTBLLP.

The data in this document contains trade secrets and confidential or proprietary information of GTBLLP, the disclosure of which would provide a competitive advantage to others. Therefore, this document shall not be disclosed, used, or duplicated, in whole or in part, for any purpose other than to evaluate GTBLLP's services described in this proposal. This proposal is an offer by GTBLLP to provide the proposed services. It is, in all respects, subject to negotiation, agreement, and signing of a specific engagement contract with the client, as well as completion of our acceptance and risk management procedures. All representations and warranties, express or implied by statute, law, or otherwise, are hereby excluded.

In this proposal, the CVs submitted for evaluation and/or the proposed commercials shall remain valid per the proposal validity mentioned in the RFP/ToR. This proposal may be subject to updation or change or further submissions at any time based on any amendments, addendums, corrigendum, change, etc., in the information supplied to us pertaining to the document (in response to which document this proposal is submitted) issued post the date of the submission of this proposal. This document was prepared based on information provided by the intended recipient; accordingly, no responsibility is accepted for any inaccuracy or error, any action taken or not taken, or any reliance placed on this document. These limitations are not intended to restrict continuing business discussions between the intended recipient of this document and GTBLLP.

Nothing contained in this proposal is to imply that this proposal is conditional and does not comply with all requirements as per the terms and conditions of the RFP/ToR.

Learning Objectives

Learning Objectives

Whether you have prior experience in data-related roles or are completely new to the field, this program provides the necessary foundations and practical skills to succeed in data-driven decision-making roles.

Program Details

- **Data Foundations & AI/ML:** Build a foundation in data types, descriptive statistics, and a macro-level understanding of AI, ML, DL, NLP, LLMs and Computer Vision with industry use cases.
- **Python for Data:** Learn Python with Pandas, NumPy, Seaborn, Matplotlib and Scikit-learn, covering visualization, machine learning, regression, classification and sentiment analysis.
- 33 • **Power BI End-to-End:** Master Power BI from installation to dashboards, including data extract and transform, data modelling, DAX calculations, forecasting and decomposition tree analysis.
- **Industry-Experienced Instructors:** Benefit from the expertise and guidance of experienced data analysts who will provide practical insights and real-world examples, understanding the unique needs and perspectives of transitioning

Key takeaways from the program

Apply data-driven decision making to real-world business scenarios through interactive exercises

Identification of critical KPIs from process matrices

Learn from industry leaders in a heterogeneous environment

Data driven business conclusions

Course Curriculum

DAY 01

Understanding Data & AI/ML

- Overview of Data Science and Analytics, Industry Scenario, Various profiles available, Various Tools used
- What is Data, Introduction to Big data, Structured and unstructured data, Cross sectional, time series and panel data, Population and sample
- Measures of central tendencies (Mean, Median & Mode)
- Measures of variation (Standard deviation, Variance) and Measures of Shape (Skewness and Kurtosis)
- Industry prevalent use cases
- Macro level understanding of AI & ML with DL, NLP, LLM, Computer Vision basics
- Basics of Data Insights & Visualization

DAY 01

Python

- Introduction to Python
- Installation and basic interface
- Basic functions of Pandas, Numpy, Seaborn, Matplotlib, Scikit-learn Library
- Visualization with Python
- Machine learning with Python
- Linear Regression – Simple Linear (1 Y and 1 X)
- Use Case Capstones: MLR (1 Y and Multiple Xs)
- Classification problem & Sentiment Analysis

DAY 02

Power BI

- Prerequisites and installation steps
- Important components and seven pillars for mastering Power BI
- Power BI desktop layout and Data Extract
- Load and Transform: Power BI Query Editor Interface
- Pivot/Unpivot, Merging and Appending tables, reading multiple files from a folder
- Data Modeling: FACT and Dimension tables, Star and Snowflake schema, Relationships
- Data Modelling using Power Pivot
- Calculations: Introduction to DAX, Calculated Columns, Measures
- Use Case Capstones: Forecasting, time intelligence, Cumulative DAX, Decomposition tree, Python integrated with Power BI

Course Curriculum

DAY 03 (Foundations)

Excel Foundations

- Introduction to Spreadsheet Modelling, Advanced Excel formula and functions
- Data Summarization using Pivot table
- Data Analysis tool pack
- What-if analysis and Solver
- Advanced excel add-ins for analysis and modelling

DAY 03 (Dashboards)

Dashboards & Automation

- Overview of Dashboards and their needs
- Advanced charting techniques to create visually appealing and dynamic charts, graphs, and dashboards to effectively communicate insights
- VBA and Macro recording to automate repetitive tasks, streamline data processing, and increase productivity
- Automation with Excel
- Python with Excel

DAY 03 (Capstones)

Use Case Capstones

- Design dashboard
- Design a form with Excel

How is it a value add for organizations?

Understand the fundamental concepts of data sciences and its application in decision making

Leverage Python libraries (Pandas, NumPy, Scikit-learn) to manipulate, analyze, and model data efficiently

Create interactive visualizations, reports, and dashboards using Power BI

Apply data analytics tools and techniques to gain valuable insights for strategic decision making

Analyze real-world business scenarios using the skills acquired throughout the course

Translate skills and experience into data analytics competencies for a flourishing corporate career

Build a working understanding of AI and ML concepts including DL, NLP, LLMs and Computer Vision

Implement best practices in data visualization and storytelling to effectively communicate insights

How is GT programme distinctive?

Training delivered by senior GT professionals having hands on consulting experience

Story telling mode of training and scenario based brainstorming sessions

Use of in-class adaptive learning methodology: Interactive, debate sessions with instructors

Experience based real examples from various domains by the instructors
Special discounted rate only for students

About **Grant Thornton**

#GTBharat
SHAPING VIBRANT INDIA

Grant Thornton – A global organisation

At Grant Thornton Bharat, we are committed to bringing positive change to all that we do. We are a founding member firm of the Grant Thornton International network and India's pre-eminent consulting firm. We #GoBeyond for our people, clients, and communities to shape Vibrant Bharat.

80,000+ people

Total global revenues
\$8.5 bn (USD)

Over **700** offices

Across
150+ markets

Grant Thornton Bharat

Member firm of Grant Thornton International
