Disclaimer

This document is CONFIDENTIAL & PROPRIETARY to Grant Thornton Bharat LLP (GTBLLP), and its circulation and use are RESTRICTED. All rights are reserved with respect to the contents of this proposal. It is supplied in confidence and, except for the intended recipient of this document and the purposes mentioned herein, it cannot be disclosed, duplicated, or otherwise used in whole or in part without the prior GTBLLP's written consent. No part of this work may be reproduced or transmitted by any means, electronic or mechanical, including photocopying and recording, or by any information storage or retrieval system, except as may be permitted in writing by GTBLLP.

The data in this document contains trade secrets and confidential or proprietary information of GTBLLP, the disclosure of which would provide a competitive advantage to others. Therefore, this document shall not be disclosed, used, or duplicated, in whole or in part, for any purpose other than to evaluate GTBLLP's services described in this proposal. This proposal is an offer by GTBLLP to provide the proposed services. It is, in all respects, subject to negotiation, agreement, and signing of a specific engagement contract with the client, as well as completion of our acceptance and risk management procedures. All representations and warranties, express or implied by statute, law, or otherwise, are hereby excluded.

In this proposal, the CVs submitted for evaluation and/or the proposed commercials shall remain valid per the proposal validity mentioned in the RFP/ToR. This proposal may be subject to updation or change or further submissions at any time based on any amendments, addendums, corrigendum, change, etc., in the information supplied to us pertaining to the document (in response to which document this proposal is submitted) issued post the date of the submission of this proposal. This document was prepared based on information provided by the intended recipient; accordingly, no responsibility is accepted for any inaccuracy or error, any action taken or not taken, or any reliance placed on this document. These limitations are not intended to restrict continuing business discussions between the intended recipient of this document and GTBLLP.

Nothing contained in this proposal is to imply that this proposal is conditional and does not comply with all requirements as per the terms and conditions of the RFP/ToR.

Lean Six Sigma – AI-Enabled, Data-Driven Decision Making

#GTBharat
SHAPING VIBRANT INDIA

What is Lean Six Sigma?

Lean Six Sigma is a **structured, fact-driven methodology** focused on improving process performance by reducing variation, eliminating waste, and ensuring consistent, sustainable outcomes. It enables us to make **data-based decisions**, strengthen process control, and deliver measurable business impact across functions and industries.

In today's digital-first environment, Lean Six Sigma is **augmented with Artificial Intelligence (AI), Generative AI (GenAI) and Machine Learning (ML)** to accelerate analysis, enhance insight quality and enable **predictive and prescriptive decision-making**, while retaining the robustness of the DMAIC framework.

- Faster pattern detection from large datasets
- Intelligent, data-driven root cause analysis
- Predictive performance and risk insights

How is it a value add for organizations?

Consistent Results

Solution Orientated

Data-Backed Insights

Informed Decisions

Structured Workflows

Stronger Process Control

AI-Enabled Root Cause Analysis

Proactive Mindset

Innovative Solutions

Adoption of AI-Enabled Lean Six Sigma Across Diverse Sectors

Finance and Accounting

- Faster **book closure and reconciliation cycles** through process analytics
- Improved **reporting accuracy and compliance monitoring** using data validation and control mechanisms
- Reduction in **disbursement and approval turnaround time** through automated workflows
- Better **working capital visibility and cash cycle control** using real-time dashboards and predictive insights
- Lower risk of **manual errors** through intelligent checks and AI-supported analysis, and more.

Marketing and Sales

- Improved **sales funnel and budget effectiveness** through data-driven analysis
- Better **market opportunity identification** using VOC analysis and trend insights
- Faster **sales-to-cash cycle performance** through process reengineering
- Enhanced **campaign and pre-sales accuracy** using analytics and visualization tools
- Stronger **customer insights** through segmentation and decision-making and more....

Human Resources

- Reduced **onboarding cycle time** through workflow redesign and automation opportunities
- Improved **compensation and workforce analysis** using predictive and statistical methods
- Better **resource allocation and productivity tracking** through real-time dashboards and KPI monitoring
- Increased **HR process accuracy** in payroll, separation and compliance activities
- Stronger **SLA adherence and employee service quality** through control mechanisms and more....

Operations

- Reduction in **turnaround time across core operational processes**
- Improved **error proofing and process reliability** using root cause analysis and process control
- Better **cash flow and working capital efficiency** through process visibility
- Targeted **cost optimization** across facilities, transport, travel and support
- Faster execution through **workflow optimization, dashboards and AI-enabled monitoring and more...**

How is it a value add for organizations?

- Reduced **procurement and inventory cycle time** through process optimization
- Improved **delivery and order fulfillment performance** through workflow standardization
- Better identification of **waste and variation** across supply chain activities
- Enhanced **billing and invoicing efficiency** with process controls and automation opportunities
- Improved **customer experience** through faster service cycles, omni channel connectivity and operational visibility

01

RETAIL

MANUFACTURING

02

- Improved **production turnaround time and throughput** through Lean diagnostics
- Reduced **defects, breakage and rework** using statistics and root cause analysis
- Better **changeover and downtime management** through predictive insights
- Improved **production planning, inventory and logistics performance**
- Stronger **capacity planning and preventive maintenance effectiveness**

- Reduced **service delivery time and ticket resolution cycle time**
- Improved **defect management and quality performance** across delivery processes
- Enhanced **requirements accuracy and transition quality** through structured analysis
- Better **SLA compliance and productivity monitoring** with dashboards and controls
- Stronger **process value analysis and automation opportunities** through AI-enabled LSS

03

IT/ITES

HEALTHCARE

04

- Reduced **patient waiting time and discharge turnaround time**
- Improved **billing, pharmacy and report issue cycle time** through process redesign
- Better **patient flow and inter-department coordination** using KPI-based monitoring
- Increased **response effectiveness and service quality** across critical care pathways
- Improved **resource productivity and financial performance** through data-driven operational control

Few AI-Enabled Lean Six Sigma Advantages for Students

AI-Enabled Lean Six Sigma professionals continue to be in demand as organizations seek to **improve efficiency, reduce waste, and enable data-driven transformation**

GT **AI-Enabled** Lean Six Sigma Approach

#GTBharat
SHAPING VIBRANT INDIA

GT Lean Six Sigma Approach (AI-Enabled Version)

- GT's AI-Enabled Lean Six Sigma programme combines classical DMAIC rigour with AI-assisted insight generation, data visualization and digital problem-solving. The learning model uses real scenarios, tool demonstrations and AI-driven analytics to build industry-ready capability.
- Uses a blend of **interactive classroom/virtual delivery**, scenario-based learning and demonstrations of analytical tools
- Integrates **AI, GenAI and ML concepts** into core Lean Six Sigma modules to enhance insight generation and decision-making
- Provides hands-on exposure to **Minitab, Excel analytics, data visualization and AI-augmented analysis**
- Flexible assessment and continuous learning support through an intuitive **Learning Management System**
- Access to templates, tools, dashboards and guided project support for seamless capstone project execution

Key takeaways from the program

Linking business needs to digital & operational excellence initiatives

Data-driven and AI-supported business conclusions

Hands-on learning through Capstone Projects

Learn from industry practitioners in a real-world, heterogeneous environment

Face-to-face and real-time query resolution for deeper understanding

Practical exposure to predictive insights, visualization & structured problem-solving

Key Expected Outcomes

GT is uniquely positioned to deliver outcome-oriented, high-impact and AI-enabled learning solutions. Our ability to drive learner outcomes is anchored in the following:

AI-Enabled Lean Six Sigma Programme Overview

Lean Six Sigma Green Belt

- **Flexible Learning:** 4/5 day (28-hour) session delivered via virtual or classroom modes.
- **Tool Mastery:** Hands-on training using **Minitab** or **Advanced Excel** (includes **Lifetime Access**).
- **Certification Goal:** Build foundational skills with a **65% passing score**.

Lean Six Sigma Black Belt

- **Advanced Training:** Comprehensive 6/8 day (48-hour) program split into two phases.
- **Data Expertise:** Deep dive into complex analysis using **Minitab** or **Excel** (includes **Lifetime Access**).
- **Expert Standard:** Achieve a high level of proficiency with a **70% passing score**

Lean Six Sigma (Green Belt Training TOC)

Lean Six Sigma (Black Belt Training TOC)

Phase I (4 days)

Recognize & Define

- Introduction to Six Sigma and Lean, Evolution of Lean Six Sigma and Key Contributors
- Overview of DMADV and DMAIC Frameworks
- Lean Six Sigma, AI, and Prompt Engineering Fundamentals
- Approaches for Project Identification: COPQ, QFD, and Balanced Scorecard (BSC)
- Voice of the Customer (VOC) Collection and Refine with NLP
- VOC Segmentation and Prioritization
- Translation of VOC into Critical-to-Quality (CTQ) Requirements
- Project Definition and Charter Development
- High-Level Process Mapping Using SIPOC

Measure

- Detailed Process Mapping Using PFD and Swim Lane Analysis
- Understanding Data and Data Types
- Data Collection Planning
- System Intelligence Assessment
- Introduction to Minitab & Data Visualization
- Sampling Techniques
- Measurement System Validation Using MSA Techniques (Gage R&R, AAA)
- Process Capability Analysis Using DPMO, Cp, and Cpk
- Graphical Analysis Using Power BI

Phase II (4 days)

Analyze

- Identification of Potential Causes
- Root Cause Analysis Using Cause-and-Effect Diagrams and Why-Why Analysis
- Application of Lean Principles
- Waste Identification Using TIMWOODS
- Application of the Pareto Principle
- Validation of Causes Through Statistical Analysis
- Hypothesis Testing (Parametric, Non-Parametric, and Proportion Tests)
- Correlation and Regression Analysis (Simple Linear, Multiple Linear, and Logistic Regression)
- Predictive Analysis

Improve

- Identification of Six Sigma and Lean Solutions Through Structured Brainstorming
- Solution Design Leveraging Digital Transformation, Industry 4.0, RPA, AI/ML, etc.
- Business Statistics for Decision-Making
- Solution Prioritization and Selection Using CBM, NGT, and Pay-Off Matrix
- Solution Identification Using Lean Tools such as Kaizen, Kanban, 5S, and Poka-Yoke
- Risk Identification and Mitigation Using FMEA
- Change Management for Effective Implementation
- Solution Testing and Process Piloting
- Solution Justification and Cost-Benefit Analysis

Control

- Solution Planning and Implementation
- Control Plan Development
- Control Charts – Variable and Attribute Charts
- KPI Dashboard Development
- Solution Adoption and Acceptance Strategy
- Project Closure and Formal Approval

How is GT Programme Distinctive?

Capstone Project Approach

Participants are given an equal opportunity to undertake a 3-month capstone project, designed to prepare them for the industry and provide hands-on experience with real-life project scenarios.

Credentials & Additional benefits

Lean Six Sigma programme by Grant Thornton comes with Global **Gold Standard** Delivery

Exclusive Institutional Benefits

- **Industry-Ready Skillset:** Hands-on mastery of Minitab, practice on PowerBI and Advanced Excel with **lifetime access** to templates.
- **Real-World Application:** A **3-month Capstone Project** and live project opportunities for top performers.
- **Elite Mentorship:** Direct "Fire Side Chats" with **GT Partners** and coaching from Senior Consultants.
- **Global Alumni Status:** Students join the prestigious **Grant Thornton Alumni network** upon completion.
- **Digital Authority:** Verifiable blockchain-backed certificates and badges to boost LinkedIn visibility.
- **Scalable Impact:** Access to a pool of experts who have already upskilled **80,000+** professionals.
